

clean air, here

CAPTURES 99.97% OF HARMFUL PARTICLES

● Good Design ● Quality Assurance ● Strict Quality Inspection

Fresh and Healthier Air For

Who Needs Air Purifier?

Children

Pregnant woman

Old people

Smoker

Pets keeper

Allergies populations

Susceptible populations

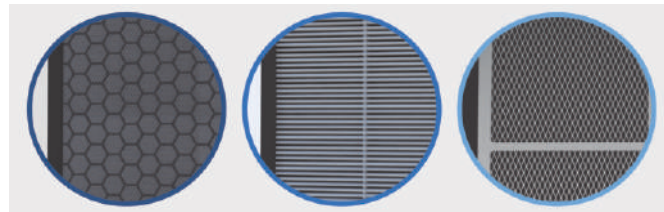

Open kitchen

The International First-Class Quality of Filter Material

Filter material is the core of purifier product. The key point of good filter material is not quality, but its effectivity. We select high-quality filter materials for you and make the most reasonable filter solution with stringent specification.

(Images for illustrative purposes only. Please in kind prevail.)

Activated carbon filter

We use the activated carbon which can do strong decomposition and removal effectively to formaldehyde, benzene, ammonia, TVOC, etc in the indoor air. After testing by authority organizations, the formaldehyde removal rate in 1 hour can reach 94.55% and the rate in 2 hours can reach 99.09%.

HIFIL filter

The HIFIL filter can effectively filter out the particulate matter of larger than 0.05μm (Commonly referred PM2.5 refers to the fine particulate matter with diameter less than 2.5μm in the air).

pre-filter

Pre-filter can filter out indoor large particles of dust, hair, pollen and animal allergens more effectively.

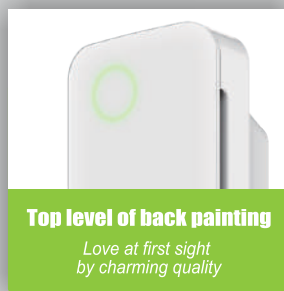

3 Stage Air Cleaning

Pre-Filter	Large Particles	Pet Dander	Bacteria	Mold Spores
HIFIL Filter	Pollen	Dust	Smoke	Fine Particles
Activated Carbon Filter	HCHO	Viruses	Bacteria	Odors

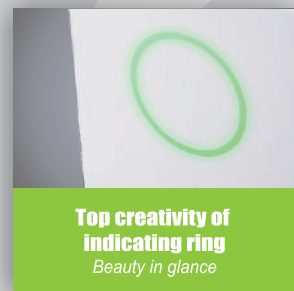

Beauty of Design

PM 2.5 Indoor?

Filter Principle

Beautiful Flowers Troublesome Pollen

Camellia

Peachblossom

Iris confusa

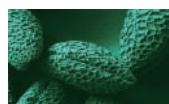

Rhododendron

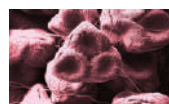

Camellia Pollen

Peachblossom Pollen

Iris confusa Pollen

Rhododendron Pollen

Pollen is one of the most common allergens. These things which seems cute, but harmful to those people with allergies. Now, our air purifier makes things easier. **Captures 99.97% of harmful particles** such as pollen, dust, and smoke down to 0.1 microns in size. Keep you away from the trouble of pollen and other problem of air.

Top Class Components

Best Sensor

Sharp Dust Sensor

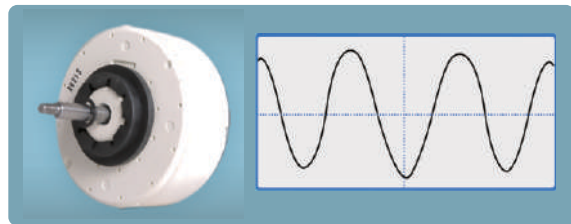

Detect tiny particulate matter sensitively and provide accurate feedback of indoor air pollution by smoke, pollen and particulate matter

Photosensitive Sensor

High sensitivity photosensitive sensor makes the purifier to coordinate with the surrounding environment. Purifier starts the night mode automatically when the light dims.

Brushless DC Motor

Brushless DC motor with higher efficiency and lower noise, more precise control. It makes air purifier more efficient, more stable, more quite.

The Most Comfortable Touch Buttons

A-class capacitive touch panel. Prevent scratches and easy to clean. Silky and smooth touch allows you to enjoy comfortable operating experience.

Super Convenient Ergonomic Handle

Quality ergonomic handle is designed especially for the purifier to move between different rooms. Convenient and time-saving.

Easily Removable Magnetic Adsorption Panel

Exquisite magnetic adsorption panel design, make it much easier for maintenance.

Smart Safety Lock Design

With humanized safety lock design, purifier will power off automatically when panel is removed. Protect family safety.

Performance

Ultra-Low Power Consumption

Power consumption in sleep mode is only 2.5W and purifier can run for about 400 hours per kilowatt-hour. The power consumption in super high speed purification grade is only 50W and purifier can run for about 20 hours per kilowatt-hour.

Ultra-Low Operating Noise

Benefited from DC motor and optimized design for airflow channel, the noise can be as low as 20 dB(A).

Invincible Function

Special Design For Air Outlet–Good For Large Space

Large space means waiting ? The unique back-filling fresh air-out airflow can generate indoor omni-directional tridimensional circulating air and purify the air quickly.

Comfortable Sleep Mode

Low noise, no lights in comfortable sleep mode. Creating a quiet and comfortable environment.

5 Grade Air Outlet Control

Different air-out speed in different occasion. 5 grade design, easy to use, to satisfy all your needs.

Smart Indicator Light

How is the air quality ? Is the air purifier effective ? The answer is visible. We design an air quality indicating ring, which will show you how is the air condition intuitively. Life quality is improved!

The Most Convenient Operation Mode

Our intelligent operating mode can be run with a single button press. According to the air quality information collected by high sensitivity intelligent sensor, the appropriate air-out speed can be adjusted automatically. Think what you think and do what you need.

Smart Timing Function

Setting OFF time when it's working, setting "ON" time when it's "OFF". 1/2/4/8 hours mode, flexible to arrange your own schedule.

Smart Remind Function

When any filter is dirty, filter button will twinkle. If HIFIL filter or activated carbon filter is not replaced in time, purifier will be locked and shut down to avoid the secondary pollution.

Specification

Model name	SP-ME32A(W)-I
Color	Pearl White
Recommended application area	23-39 m ²
CADR (Clean Air Delivery Rate)	328 m ³ /h
CCM (Cumulate Clean Mass)	60 m ³ /h
Filter Life	Replacement warning or 2 years whichever is earlier
Operating noise	32-63dB (A)
Air-out speed grade	5 grades adjustable
Input power (W)	48
Net weight (kg)	7.8
Dimension (mm)	385 x 654 x 220
Filter components	Pre-filter, HIFIL filter, Activated carbon filter
MRP (Rs)	25,990.00
Warranty	12 months from the date of purchase
